Allan Davis (@cajun\_code)

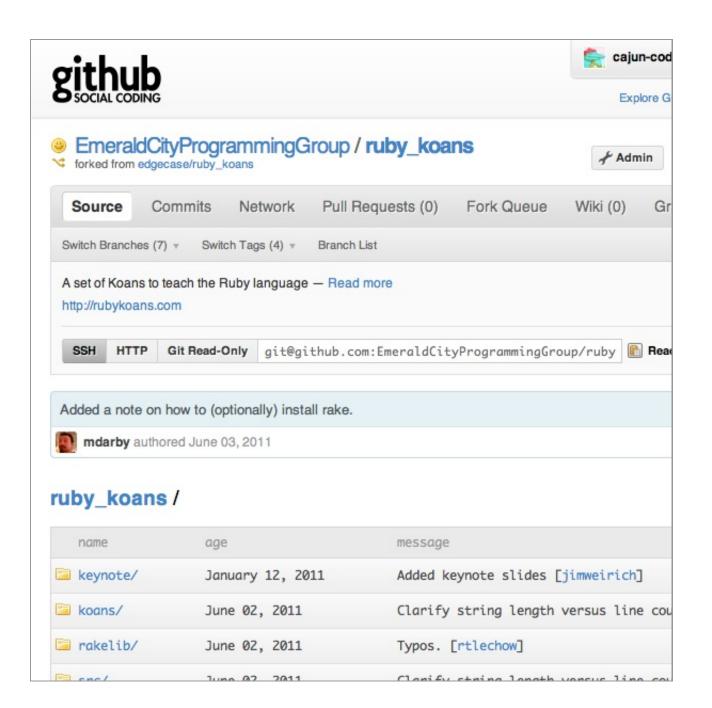

### Fork The Repo

Login to Github

go to https://github.com/EmeraldCityProgrammingGro

Click the "Fork" button

### Clone the Repo

On your fork click the clipboard to copy the URL

Open the command prompt.

\$ git clone <copied URL from <

# Working with Ruby Koans

### What are Ruby Koans

Set of unit test for Test Driven Learning

Fill in the blanks

# **Create Working Space** \$ git checkout -b ad-work

### Running the Koans

### \$ rake

rake/rdoctask is deprecated. Use rdoc/task instead (in /Users/alley/.rvm/rubies/ruby-1.9.2-p290/bin/ruby path\_t AboutObjects#test\_every\_object\_has\_an\_id has expanded yo AboutObjects#test\_every\_object\_has\_different\_id has expa AboutObjects#test\_some\_system\_objects\_always\_have\_the\_sa

The Master says:

You have not yet reached enlightenment. You are progressing. Excellent. 13 completed.

The answers you seek... <"FILL ME IN"> expected but was <0>.

Please meditate on the following code:
/Users/alley/Projects/emerald\_city/ruby\_koans/koans/ab
`test\_some\_system\_objects\_always\_have\_the\_same\_id'

remember that silence is sometimes the best answer your path thus far [..X\_\_\_\_\_\_\_

### Editing a Koan

```
def test_assert_with_message
   assert false, "This should be true -- Please f
end

# To understand reality, we must compare ou
# reality.
def test_assert_equality
   expected_value = __
   actual_value = 1 + 1

assert expected_value == actual_value
end
```

## Committing code back to the branch

\$ git commit -am "completed koan file"
